2017 - 2019 SAPHO (ACQUIRED BY CITRIX)

Senior Software Engineer

I was member of a small development team for Business Intelligence Services for B2B. Tech stack: React/JS/TS/Cordova...

2014 - 2017 RADIO FREE EUROPE / RADIO LIBERTY

Lead Front-end Developer

My role within the organization was to define and develop JS and CSS for a big news site content delivery platform.

The platform supports 60 languages across 200 countries. It contains right-to-left and up-to-down character sets (Arabic, Chinese...). We have had weekly ~3.5m unique visitors.

My responsibilities:

- Javascript (React, Redux etc.), Sass
- System architecture
- Leadership

2013 - 2014 SUMMIT MEDIA

Lead Front-end Developer

My role:

- eCommerce solutions (custom development)
- WYSIWYG editor for Magento eCommerce solutions
- Internal development trainings

2011 - 2012 UNITY MOBILE

Senior Product Manager

I have managed a product development of automated website publishing tools for eCommerce.

2009 - 2011 SANOMA MEDIA (CZ/HU/FI)

Senior Product Manager

Product management (Payment solutions, iPhone apps), Education, Training

2004 - 2007 WIRENODE

Founder, CTO, Head of Product

As a co-founder of the company (6 empl.) I was there:

- CTO, Senior Java Developer
- Product manager
- Business Development Manager

We produced:

- White-label SW platforms for TELCO (marketing tools, web builders)

- Micro-payment solutions
- Mobile (Java) games and business applications
- Content delivery platforms (E-book reader, streaming platforms)

2002 - 2004 **CLEVERLANCE**

Senior Java Developer

Various projects in the Banking, TELCO & Game development

Skills

I have been working in the *Typescript/Javascript* for years. I know the language, tools and libraries well. I have multiple experience with migrating huge codebases onto React/GQL.

My Favorite Stack

React - I know the API/patterns/tooling very well as same as the whole ecosystem with state managing libraries, *Story Book*, *Spring*, *Draft.js* etc.

GraphQL - I have deep experience with *Apollo*, *Nexus*, *Shield* and *GQL tooling*.

Next.js or Webpack - I know how to build secure universal applications with server/client side rendering.

Prisma - I have experience from few projects powered by *Prisma* + *PostgreSQL*.

Node.js - I know the platform and use that every day.

Jest + Playwright - The test tools I like, I can integrate them with *Gherkin* features.

Vercel/AWS/Heroku/Google Cloud - I can manage virtual cloud services from many vendors and additional services (S3, RDS, CloudFront...).

Sass - I know many CSS generators and CSS in JS bridges and most of the Sass API.

Additional skills

Product Management - There is a period of Product management in my work history so that I can understand better the software delivery.

Agile Team Organisation - I appreciate the agile methodologies and use them on every level of my work/live presence.

Media Literacy - It's my hobby. I have studied media on an university. I'm interested in social concepts of consuming media content and the future of the industry.
