ask me for direct contacts.

- Product manager
- Business Development Manager

2002 - 2004

**CLEVERLANCE**

**Senior Java Developer**

Various projects in the Banking, TELCO & Game development

## Skills

---

**Full Stack Programming** - I have been working in *Typescript/Javascript* for years. I know the language, tools and libraries well. I have extensive experience with huge codebases.

**Product Management** - There is a period of product management in my work history, so I understand value delivery, release management, UX and UX research.

**Agile Leadership/Training** - I have long experience Agile methodology and culture, so I can lead a team and also help with Agile transformation at every company level.

## My Favorite Stack

**React/Vue** - I like the reactive UI combined with server side rendering

**GraphQL** - I have deep experience with *Apollo, Nexus...* and also know *GQL Federation*

**Next.js / Vite / Webpack** - I know how to build secure and fast applications

**Prisma.io** - I can help with projects powered by *Prisma* and *PgSQL* on the server side.

**Node.js** - That is my favorite runtime, what is yours?.

**Jest/Vitest + Playwright** - I like these test tools, I can use them even in *BDD* mode.

**Vercel/AWS/Heroku/Google Cloud** - I can manage cloud environments and additional services (S3, RDS, CloudFront, Neon...).

**Sass+Playwright** - I know various styling approaches my preference is *utility first*.

## Additional skills

**Media Literacy** - I am interested in media products, concepts, business and the future of the industry.

**Learning** - I am also particularly interested in *learning, gamified learning* and platform building *micro-habits*.

**eGovernment** - I have an overview of products, legislation and challenges in simplifying the public sector.
